

Customer Offer Engagement Dashboard-User Guide

Purpose

This dashboard helps analyze customer engagement, offer performance, redemption behavior, customer segments, and spending patterns.

Dashboard Pages

1. Executive Overview

Provides high-level KPIs and overall customer offer performance.

2. Offer Funnel

Shows how customers move from receiving offers to viewing and completing them.

3. Customer Segmentation

Analyzes customers by age, gender, and income groups.

4. Offer Performance

Compares offer types, reward values, channels, and difficulty levels.

5. Transaction Analysis

Compares spending behavior of customers who completed offers versus those who did not.

How to Use

- Use slicers to filter data.
- Click visuals to cross-filter other charts.
- Hover over charts to view detailed values.
- Navigate between pages using dashboard tabs.

Dashboard Navigation & Usage Examples

Example Analysis

Executive Overview

- Monitor overall customer engagement.
- Track offer redemption performance.

Offer Funnel

- Identify drop-off between received, viewed, and completed offers.

Customer Segmentation

- Compare customer behavior by age, gender, and income.

Offer Performance

- Find the best-performing offer type and channel.

Transaction Analysis

- Compare spending patterns between completed and non-completed customers.

Notes

- All values are based on available dataset records.
- Dashboard updates automatically when filters are applied.
- Visuals support interactive filtering.
